Release Notes

StuCommApp – Version 2.33.0 Release Notes

This document contains the general release notes for StuCommApp version 2.33.0. Please note that not all institutions use the same features, so some updates mentioned here may not be relevant to your specific app version.

If you have any questions based on these release notes, please contact the StuComm service desk via the [portal](#) or via email: support_nl@readyeducation.com.

1. Optimisations

Release 2.33.0 implements the following updates and optimizations to improve performance, compatibility, and the overall user experience.

General (Android)
- **Update to Internal Tools & Libraries**: We have updated the underlying Android tools and libraries to the latest versions. This ensures that the app remains stable, secure, and compatible with the latest Android devices and system updates.

General (iOS)
- Bug fix for 'No Internet' overlap: Some users reported a layout issue with the 'No Internet' popup displaying incorrectly. This has been resolved to ensure that the message is correctly formatted and easy to read.
